PROFESSIONAL SUMMARY

Senior React Engineer with 20 years in software engineering and over a decade building products for US-based teams. Focused on delivering scalable, maintainable TypeScript applications in distributed environments, making pragmatic technical decisions aligned with business goals, timelines, and compliance requirements.

CORE EXPERTISE

- React & TypeScript application development
 - Delivery-focused engineering in enterprise environments
 - Pragmatic frontend architecture and maintainable code practices
 - Performance optimization aligned with product needs
 - Security and compliance-aware development
 - Collaboration with distributed US-based teams
-

EXPERIENCE

Baufest – Senior React Engineer

2013 – Present

Enterprise Manufacturing Platform (Greenfield Project)

React, TypeScript, Vite, Material UI, Vitest

- Contributed to the technical setup of a React + Vite enterprise application built from scratch.
- Identified critical limitations in the initially selected UI library and presented technical evidence that led to adopting a more stable component framework, reducing component instability and delivery risks.
- Introduced ESLint with Airbnb rules to standardize coding practices across the frontend codebase.

- Increased frontend test coverage from 0% to 92% using a pragmatic testing strategy with Vitest and AI-assisted test generation, balancing quality and execution performance.
 - Proposed and implemented a modular file structure and feature-based organization to improve scalability and maintainability.
 - Led a gradual migration to React 19 and related dependencies, minimizing production risk.
 - Collaborated with UX and backend teams in a distributed environment to deliver incremental releases aligned with business timelines.
-

US Healthcare Platform (Regulated Environment)

React, Redux Toolkit, React Query, WCAG

- Contributed to a large-scale healthcare platform within a distributed US-based team.
 - Helped formalize frontend coding standards through a cross-team alignment initiative to improve consistency and maintainability.
 - Participated in WCAG accessibility compliance efforts in a regulated healthcare environment.
 - Implemented a cost-effective multilingual solution aligned with project constraints, enabling translation support without additional licensing costs.
 - Authored technical design documents and developed complex React views balancing evolving requirements and delivery deadlines.
-

PREVIOUS EXPERIENCE (Summary)

Senior Full Stack and Frontend roles across finance, logistics, manufacturing, and enterprise environments. Experience with React, TypeScript, Node.js, .NET Core, SQL Server, and Azure-based infrastructures. Background leading small frontend teams and collaborating in Scrum/Kanban distributed settings.

TECH STACK

React, TypeScript, Redux Toolkit, React Query, Vite, Vitest, Jest, Material UI, Node.js, .NET Core, SQL Server, Azure DevOps, SonarCloud, ESLint
